

March 2019

Chemlock Nutrition's Copper Sulfate and Nutrilock® TBCC are now OMRI-Certified

Chemlock Nutrition is now only one of two companies in the United States that has earned OMRI-status for its Copper Sulfate, and one of two that has reached that same milestone for its Nutrilock® TBCC. These certifications now make Chemlock's Copper products approved for use in organic applications, and further solidifies the company's reputation for higher-purity minerals.

Chemlock's Copper Sulfate is stocked in 4 warehouses across the United States, and its Nutrilock® TBCC is in 2 warehouse locations, to serve as convenient freight locations for multiple customer bases.

Please inquire with your Chemlock Account Manager today, about how to upgrade your Copper.
