

Improve your ROI with Nutralock® Hydroxy Minerals

NUTRILOCK®
TB[C]C
Clean. Tested. Effective.

NUTRILOCK®
TB[Z]C
Clean. Tested. Effective.

NUTRILOCK®
TB[M]C
Clean. Tested. Effective.

Nutralock® Hydroxy Minerals are Uniquely Formulated for Maximum Bioavailability and Sustainability

- Stay intact until it can be absorbed in the lower GI for improved bioavailability
- Higher active content allows for diet flexibility
- Excellent flowability for improved handling
- Reduce antagonism to vitamins, enzymes and DFMs

NUTRILOCK® TB[C]C

- Immune response
- Skeletal growth & development
- Red blood cell maturation
- Enzyme function

NUTRILOCK® TB[Z]C

- Reproduction
- Growth & development
- Hoof health
- Protein synthesis
- Vitamin A utilization
- Epithelial tissue integrity
- Gut health

NUTRILOCK® TB[M]C

- Healthy bone & cartilage
- Reproduction & fertility
- Enzyme systems
- Hoof development

Nutrilock® Hydroxy Minerals: Proven Effective Across Multiple Species

Dairy and Beef

- Improved NDF digestibility vs sulfates, yielding an ROI of 5:1
- Covalent bonds with a crystalline structure, make them insoluble in the neutral pH of the rumen
- Easily absorbed in the acidic environment of the abomasum and small intestine

Poultry

- Outperform both sulfates and leading industry competitor on measures of live weight and fasted weight
- Patent-pending low-dose feeding strategy yields a higher ROI than industry standard
- Improve the bottom line without sacrificing live performance, leg quality (tibia ash), and processing yields

Swine

- More bioavailable than inorganic sourced materials
- Improved weight gain, tissue and bone development
- Improves hoof integrity and intestinal health
- More sustainable by reducing excretion and heavy metal runoff

Superior Chemistry x Superior Quality = Superior Ingredients

Chemistry is essential in formulating products. At Chemlock Nutrition, we optimize product performance and functionality by understanding chemical reactions, kinetics, and material properties. Chemistry is the foundation of our company and product development.
